To whom it may concern:

Keystone Roofing Systems provided us with excellent, professional service throughout the process of replacing our roof. Initially they came to our location, walked our roof and put together a customized recommendation package with multiple options for our facility. They walked us through all the proposed materials in detail and provided a detailed accounting of the pros and cons of each option. Prior to construction they requested a pre-construction safety meeting, during which we discussed, safety, materials storage and schedule coordination. They stuck to the plan, and their schedule and we had a roof installed in as pain free a process as you could expect. Chris Purvis was great to work with, easy to get a hold of and always ready to help. We are planning to use them on other projects moving forward.

Please feel free to contact me with further questions.
